

CONSTANTIN (CONS)

Community-driven Deflationary Token

WHITEPAPER – 2025

Constantin (CONS)

Introduction

Constantin (CONS) is a BEP-20 token with a fixed total supply and a deflationary design, aiming to establish a secure, scarce, and community-driven ecosystem.

Vision & Mission

Vision: To create a trusted digital asset that preserves value over time.

Mission: To leverage fixed supply, programmed token burns, and community-oriented distribution to foster sustainable adoption and long-term growth.

Problem & Solution

Problems:

1. Inflationary supply with unlimited minting.
2. Lack of trust due to rug pulls and team dumping.
3. Misaligned incentives for holders.
4. Volatile liquidity without locked funds.

Solutions with CONS:

- Fixed supply of 1B tokens.
- Deflationary burn mechanism.
- Hybrid release schedule (time-based + milestone-based).
- Locked development fund (150M for 2 years).
- Pseudonymous but community-driven governance.

Technology

- Built on Binance Smart Chain (BEP-20).
- Simple, auditable, and secure contract.
- Native burn function.
- Compatible with MetaMask, Trust Wallet, and Uniswap.

Tokenomics

Total Supply: 1,000,000,000 CONS

Category	Allocation	Purpose
Initial Liquidity	100M	Provide stability in DEX pools
Airdrops & Community	75M	Rewards, marketing, user adoption
Exchange Listings	100M	Liquidity + fees for CEX onboarding
Development Fund	150M (Locked)	Growth & partnerships
Buyback & Burn	75M	Long-term price support & deflation
Hybrid Release	250M	Controlled gradual release

CONS Tokenomics Distribution

Hybrid Release Model (250M)

- **Time-Based:** 125M over 5 years (25M/year).
- **Milestone-Based:** 125M released when:
 - 25M after 3 CEX listings
 - 25M after 50k holders
 - 25M after DApp launch
 - 25M after strategic partnership
 - 25M after \$100M market cap

Why Hybrid?

- Combines predictable release with milestone-linked trust.
- Prevents oversupply while rewarding growth milestones.

Roadmap

- Q3 2025: Contract deployment + branding.
- Q4 2025: Uniswap listing + airdrops.
- 2026: CEX listings, burn program, DApp launch.
- 2027: Ecosystem expansion + partnerships.

Team

Community-driven, pseudonymous team:

- Alex (Lead Developer)
- Marco (Strategic Ops)

Risks

- Market volatility.
- Smart contract vulnerabilities.
- Early liquidity risks.
- Adoption challenges.

Conclusion

CONS integrates scarcity (fixed supply), deflation (burn), and hybrid release to align incentives and create long-term value.
